

DROID BY MOTOROLA

Get the Most Out of your DROID by Motorola

Enjoy improved performance with these OS enhancements.

Verizon Wireless is pleased to announce new software enhancements for your DROID by Motorola smartphone. The Droid by Motorola software version AP:ESD56/BP:C_01.3E.01P update includes numerous improvements.

The following enhancements to the Droid by Motorola have been made:

- OS stability is improved.
- Battery life is improved.
- Camera auto focus functionality is improved, and time between shots is reduced.
- Enhancements for three-way calling.
- Audio for incoming calls is improved.
- When receiving a call on call waiting, the speakerphone now remains on.
- Bluetooth® functionality is improved; background echo is eliminated.
- Improved Bluetooth phone book transfer of contacts to in-vehicle Bluetooth solutions.
- After closing a GPS application, the GPS icon will now automatically be removed from the notification panel.
- Users can now receive SMS and MMS messages after an EMS message is received.
- SMS and MMS may now be sent to seven-digit addresses.
- Google® contact merging has been updated to accommodate seven-digit numbers.
- Visual Voice Mail notices now arrive instantaneously.
- The corporate calendar widget user interface is updated.
